INSTRUCTIONS FOR PREPARATION & USE

Your baby's health depends on carefully following the instructions below.

Proper hygiene, prescription, dilution, and storage are integral to preparing infant formula. Do not substitute or dilute this formula, as it is not designed to be used for infants or children or to replace medical treatment. This product may not be used for infants or young children under 12 months of age. Follow the directions for pour and prepare, including the use of a clean, dry powdered container.

1. Wash hands thoroughly with soap and water before preparing formula.
2. Pour desired amount of water into clean powder container.
3. Add powdered formula. Stir to dissolve.
4. Carefully measure formula with a clean, dry measuring spoon. Add water to the appropriate level for your baby's age and weight. Stir gently to ensure all powder is dissolved.

Ask your baby's doctor about the need to use cooled, boiled water for mixing and the need to boil clean drinking water before feeding your baby.

Please read these instructions carefully before use. Failure to follow these instructions could result in severe harm. Once prepared, store formula at room temperature, away from direct sunlight, and use within 24 hours.

For Infants and Toddlers with Severe Cow's Milk Protein Allergy

This product is hypoallergenic and designed for infants and toddlers with severe cow's milk protein allergy. It is not intended for use by infants or children or as a replacement for milk-based formulas.
